

## Public Safety & Justice Portal Cisco Video Collaboration Endpoints

### Cisco DX-650

The Cisco DX650 is built to deliver:

- Integrated, always-on and secure, high-definition (HD) voice and video communications
- Conferencing with Cisco WebEx® meeting applications
- Presence and instant messaging with the Cisco Jabber® messaging integration platform
- On-demand access to cloud services

It is intended to meet the demands of people who must collaborate effectively with experts even if separated by long distances.

Innovative collaboration capabilities are available right out of the box with the Cisco DX650. It provides native support for HD 1080p at 30 frames per second (fps); video calling interoperability to other H.264 and Advanced Video Coding (AVC) video endpoints, including Cisco Unified IP Phone 8900 and 9900 Series models; the Cisco Jabber platform on personal mobile devices; and Cisco TelePresence® System-compliant endpoints and room systems.

### Cisco DX-70 - Improved Collaboration in a Compact Package

## Cisco SX-10/20 - Video-Enable Your Small to Medium Collaboration Spaces

### Cisco TelePresence SX Series Quick Set

These flexible and highly scalable codec and camera sets can easily turn any flat panel display into a video collaboration system for small-to-medium size meeting rooms and huddle spaces.

The [Cisco TelePresence SX20 Quick Set](#) delivers high-definition video quality, multiparty conferencing. Customers also get three different camera options to accommodate room size and configurations at a value price. It provides the performance expected of more expensive systems, in a sleek, compact, multi-featured package.

The [Cisco TelePresence SX10 Quick Set](#) is an all-in-one, camera-in-codec unit. It offers business-quality video communications at a highly scalable price and easy installation and deployment. The SX10 is ideal for small meeting rooms and huddle spaces.

## Cisco MX-Series - Turn Meeting Rooms into Video Collaboration Hubs

The MX Series allows you to turn any conference room into a video collaboration hub—connecting teams, customers, and partners face to face at a moment's notice. Two MX Series product lines—the MX700 and MX800 Series performance line and the MX300 and MX200 Series value line—give you great flexibility to deploy and scale video with the needs of your business.

### Cisco TelePresence MX700 and MX800 Series

Cisco TelePresence MX700 and MX800 systems represent the performance line within the Cisco portfolio of integrated video collaboration room systems. They offer a superior video and audio experience. The systems combine beautiful design and powerful functionality into an all-in-one solution for medium-to-large meeting rooms.

MX700 and MX800 systems can transform your meeting room experience—whether in connecting teams worldwide or in local meetings with a focus on content. The MX700 and MX800 Series are ideal for team-based collaboration, boardrooms, meeting rooms, and video-centric rooms:

- The MX800 Dual features two 70-inch LED screens for a people-and-content or a people-and-people experience
- The MX800 Single features one 70-inch LED screen for a people-focused experience
- The MX700 features dual 55-inch LED for a people-and-content or a people-to-people experience
- Choose a powerful 1080p60, 20x total zoom single camera or an optional intelligent dual-camera, speaker-tracking solution (MX800 Dual offered with dual camera only)
- Intuitive Cisco TelePresence Touch 10 provides an easy-to-use interface

### Cisco TelePresence MX200 and MX300 G2 Series

The MX200 and MX300 G2 Series are part of a redesigned, second-generation, value product line within the Cisco video collaboration room endpoints portfolio. Just place the MX200 or MX300 G2 Series device where you want it, plug it in, and type in user credentials. The MX200 and MX300 G2 Series are designed for small-to-medium meeting rooms and spaces.

Additional capabilities include:

- Cisco TelePresence Touch 10 interface
- Dual display for an optimal content-viewing experience
- Four-way embedded Cisco Multi-Site option for easy multiparty calling without the need for a multipoint control unit (MCU)
- Modern, sleek, and approachable design to increase aesthetic appeal and usability
- Auto-provisioning and self-configuration make the MX200 and MX200 G2 Series easy for IT to install on the network
- 1920 x 1080 resolution on a high-quality, 42-inch or 55-inch display
- Supports up to 1080p60 video resolution and 1080p30 content
