

# Collaboration Meeting Rooms (CMR) Cloud

Create Easy-to-Use Meeting Rooms Featuring Video and Data Sharing

## Benefits to Public Safety

- Meet Instantly Anywhere Anytime: Use iOS and Android Mobile Apps to host and join meetings regardless of location, even in transit
- Improve Situational Awareness: Share a variety of audio, video and data, even applications, across devices and locations anywhere, anytime
- Collaborate Across Agencies: Enable personnel to improve engagement and build trust within their departments and across agencies, even with other jurisdictions
- Speed Response: Send critical information faster, accelerate decision making and assist officers in the field faster
- Stay Secure: Keep your agency's communications secure wherever personnel are deployed, using industry leading cybersecurity
- Reduce Costs: Eliminate travel, fuel usage, large infrastructure outlays and IT maintenance and support
- Train and Educate 24/7: Increase efficiency and new opportunities for personnel to train anywhere, anytime in real-time

## Industry Leading Always-Available Meeting Experience

Cisco and our partner, CDW-G, are helping agencies like yours increase the pace of digital transformation by deploying the latest in innovative digital technologies. Through our industry leading meeting solution, Cisco® Collaboration Meeting Rooms (CMR) Cloud, we can help empower your agency with capabilities that:

- Provide always-on personal meeting rooms featuring real-time audio, video and data sharing anywhere, anytime on any authorized device
- Create better outcomes by speeding decision making
- Reduce costs while improving return on investment.

## What it is

Cisco® Collaboration Meeting Rooms (CMR) Cloud is a simple-to-use video conferencing service that couples personal rooms with the cloud-based Cisco WebEx® Video Bridge into one, always-available meeting experience. CMR simplifies your IT department's workload and makes it easy for participants to join meetings from any standards-based video endpoint by providing a video bridging service that connects all types of endpoints into one meeting. It eliminates the need for you to buy on-premises equipment while enabling each participant, regardless of endpoint, to enjoy the same video and audio experience.

CMR Cloud also enhances WebEx Personal Rooms by turning them into permanent, personalized video conferencing spaces. This enables personnel from your department or across agencies (including federal) to join you in a meeting from any endpoint, at any time, without requiring cumbersome codes by simply visiting its URL on a desktop or mobile browser. Or personnel can dial the URL on a video endpoint for a truly open virtual office environment. Your team members can even customize their personal room name for a better user experience.

As a cloud based service, CMR Cloud enables you to quickly scale your video conferencing reach and capacity from one to hundreds of participants while simplifying the complexity of managing disparate technologies. As a subscription based service, it also allows you to shift from a capital expenditures (CapEx) model to an operating expenses (OpEx) financial model while leveraging existing network infrastructure and devices.

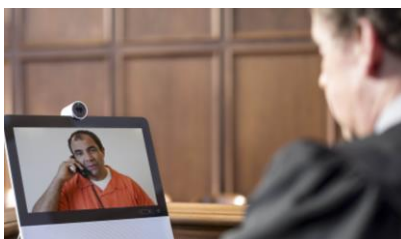

### Features

- **Video Conferencing:** Invite others to join, single or multiscreen with 720p video and content on standard or widescreen using presence, laptops, tablets or smartphones
- **Screen Sharing:** Share content or your entire screen in real-time and also let others take control to share theirs as well
- **Advanced Security:** 128 bit encryption, personal identification number access, capability to lock rooms and use of SIP TLS/SRTP
- **Interactive Multimedia:** Engage your audience by incorporating multimedia presentation, including PowerPoint, Flash, audio and video files
- **Personal Rooms:** Create permanent, personal rooms for personnel to use throughout their shifts and that can be left open or locked for others
- **Recording/Editing/Playback:** Securely create encrypted and password protected recordings of your meetings for future reference, training or demonstrations
- **Scalable as Needed:** Cloud-based approach for easy roll out and expansion as your organization grows
- **Leverage Existing Infrastructure:** Use your existing legacy systems without need for additional infrastructure maintenance or expense
- **In-Meeting Controls:** See, mute and drop participants, lock meetings and fully record

### Uses for Law Enforcement

For law enforcement, CMR Cloud provides exciting new capabilities that address the needs of end users and system administrators alike. By using it for smartphones, tablets, laptops and presence units, your law enforcement agency can be empowered on the frontlines and behind the scenes to:

- Increase situational awareness of responders before and during incidents by setting up incident response rooms to instantly connect with other officers in the field or leaders at headquarters
- Collaborate in real-time across departments and agencies to gain insight from other personnel and get direction from senior leaders
- Send and view critical information securely in real-time
- Take training and attend continuing education events anywhere, anytime
- Initiate roll-call/team meetings without recalling personnel to headquarters
- Use interactive presentations and increase attendance at meetings.

### Uses for Courts

For courts, CMR Cloud can speed the pace of justice by providing real-time collaboration that streamlines proceedings, reduces processing times and improves safety for court workers. CMR Cloud can empower courts on the frontlines and behind the scenes to:

- Enable judges and arbiters to reach multiple sites simultaneously to review evidence and hear legal arguments, reducing case costs and backlogs
- Allow parties and witnesses to appear via secure video for motions and testimony
- Provide safe arraignment of defendants using secure, remote video to reduce opportunities for confrontation and escape
- Increase collaboration among court officials, staff and administrators while eliminating travel time, costs and logistics issues.

CMR Cloud allows courts to move sensitive information securely over mobile networks so it can be accessed or shared quickly during arraignment, trial and sentencing.

### Why Cisco/CDW-G

Cisco and CDW-G offer a variety of solutions and services that can personalize the user experience, streamline processes and enable your personnel to enjoy increased efficiencies and innovation. Only Cisco brings an integrated platform across network, datacenter, cloud, security, collaboration, analytics and IoT for faster digital transformation with reduced risk.

By helping public safety agencies personalize citizen experiences, transform processes and empower their personnel, Cisco is changing the way cities live, work, learn and play. To learn more about this opportunity, contact your CDW-G account manager at 1.800.800.4239 or email [publicsafety@cdwg.com](mailto:publicsafety@cdwg.com).
