

WebEx Meeting Center

Real-Time Secure and Reliable
Video Communications
Anywhere, Anytime

Industry Leading Collaboration to Empower Your Agency

At Cisco and our partner CDW-G, we are committed to helping agencies like yours benefit from the latest in digital technologies. Through our industry leading collaboration solution, Cisco WebEx® Meeting Center, we can help empower your agency with capabilities that:

- Provide real-time audio, video and data sharing anywhere, anytime on any authorized device
- Create better outcomes by speeding decision making
- Reduce costs while improving return on investment.

What it is

Cisco WebEx® Meeting Center is the industry leader in video and web conferencing, providing real-time audio, video and data sharing between meeting attendees. It lets any authorized personnel in your agency actively participate in video meetings using a

variety of devices and from any location; in the field, at home or in the office. By engaging mobile video conferencing, you can free your team from time consuming travel, associated costs, and more importantly, delayed responses – which can be critical in today's public safety environment.

WebEx is delivered as software as a service (SaaS) and hosted/managed through our partner, CDW-G. By using an experienced partner like CDW-G, Cisco enables your agency to deploy the latest in collaborative technologies without new infrastructure, installation costs or long, drawn-out deployment timelines.

Uses for Law Enforcement

For law enforcement, WebEx can provide a variety of innovative capabilities to improve outcomes and increase efficiencies. By deploying it on smartphones, tablets, laptops and presence units, WebEx can empower law enforcement on the frontlines and behind the scenes to:

- Increase situational awareness of responders before and during incidents by connecting them to other officers in the field or leaders at headquarters
- Collaborate in real-time across departments and agencies to gain insight from other personnel and get direction from senior leaders

Benefits to Public Safety

- **Improve Situational Awareness:** Share a variety of audio, video and data across devices and locations anywhere, anytime – even in transit
- **Collaborate Across Agencies:** Enable personnel to improve engagement and build trust within their departments and across agencies, even with other jurisdictions
- **Speed Response:** Send critical information faster, accelerate decision making and assist officers in the field faster
- **Stay Secure:** Keep your agency's communications secure wherever personnel are deployed, using industry leading cybersecurity
- **Reduce Costs:** Eliminate travel, fuel usage, large infrastructure outlays and IT maintenance and support
- **Train and Educate 24/7:** Increase efficiency and open up new opportunities for personnel to train anywhere, anytime in real-time

Features

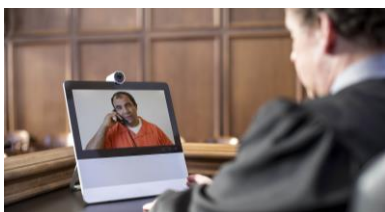

- Video Conferencing: Invite others to join, single or multiscreen with 720p video and 1080p content on standard or widescreen using presence, laptops, tablets or smartphones
- Screen Sharing: Share content or your entire screen in real-time and also let others take control to share theirs as well
- Interactive Multimedia: Engage your audience by incorporating multimedia presentation, including PowerPoint, Flash, audio and video files
- Personal Rooms: Create permanent, personal rooms for personnel to use throughout their shifts and that can be left open or locked for others
- Recording/Editing/Playback: Securely create encrypted and password protected recordings of your meetings for future reference, training or demonstrations
- Cross-Platform Support: Windows, Mac and Linux using Explorer, Safari, Firefox, Chrome or Edge browsers
- Scalable as Needed: Support up to 200 concurrent users in a single meeting
- Full Integration: Video and audio integration plus initiate meetings from Office, Outlook, Lotus Notes or instant messaging solutions

- Send and view critical information securely in real-time
- Take training and attend continuing education events anywhere, anytime
- Initiate roll-call/team meetings without recalling personnel to headquarters
- Use interactive presentations and increase attendance at meetings.

Uses for Courts

For courts, WebEx can speed the pace of justice by providing real-time collaboration that streamlines proceedings, reduces processing times and improves safety for court workers. WebEx can empower courts on the frontlines and behind the scenes to:

- Enable judges and arbiters to reach multiple sites simultaneously to review evidence and hear legal arguments, reducing case costs and backlogs
- Allow parties and witnesses to appear via secure video for motions and testimony
- Provide safe arraignment of defendants using secure, remote video to reduce opportunities for confrontation and escape
- Connect underserved groups with interpreters and eliminate travel and associated “on-the-clock” fees
- Increase collaboration among court officials, staff and administrators while eliminating travel time, costs and logistics issues.

WebEx allows courts to move sensitive information securely over mobile networks so it can be accessed or shared quickly during arraignment, trial and sentencing. It can also help ensure prisoners are treated fairly and more affordably by using video for inmate healthcare, visitations and education.

Financing

Cisco Capital can help you acquire the technology you need to achieve your objectives and stay competitive. We can help you reduce CapEx, accelerate your growth and optimize your investment dollars and ROI. Cisco Capital financing gives your agency flexibility in acquiring hardware, software, services and complementary third-party equipment. And there's just one predictable payment.
