

Technology Software for Small and Medium Businesses

Power to Grow. Priced to Go.

You can now buy Oracle's complete technology stack through CDW. Oracle's technology stack includes the world's #1 database, Oracle Database 10g, and the fastest growing middleware suite, Oracle Fusion Middleware, including Oracle's Standard Edition One products, priced and packaged specifically for small and medium businesses.

Oracle Database for Small Business

Oracle Database 10g Standard Edition One is a full-featured database for one or two processor servers packaged and priced for small and medium businesses or departments.

- Installs easily and offers built-in automated management
- Includes tools to quickly build secure applications with a Web browser
- Easy to develop (incl. Windows .NET, Visual Studio, SQL Developer, Java, XML, Oracle Application Express)
- Suitable for all data, applications and OS platforms, including Windows and Linux

Only \$125 per named user license (minimum 5 users)

Oracle Database For Medium-sized Businesses

Oracle Database 10g Standard Edition is a full-featured database for up to four processors that delivers a low-cost solution for small and medium businesses that demand continuous availability and scalability.

- Easy to install and manage, complete with built-in automated management
- Easy to develop (incl. Windows .NET, Visual Studio, SQL Developer, Java, XML, Oracle Application Express)
- 24/7 availability and scalability on demand with Oracle Real Application Clusters
- Includes tools to quickly build secure applications with a Web browser
- Suitable for all data, applications and OS platforms, including Windows, Linux and Oracle

Only \$250 per named user license (minimum 5 users)

Oracle Middleware for Small Business

Oracle Application Server 10g Standard Edition One enables small and medium businesses or departments to roll out solutions quickly through pre-built functionality that reduces development time and simplifies maintenance and operations. As a comprehensive platform, it provides everything necessary to implement a Portal to share information, a Web Site to highlight your company, or a Web/Java-based application to provide custom functionality. All pre-assembled and tested.

- Provides a complete and integrated application platform
- Enable a fast, scalable Web Site with pre-assembled set of scripting, runtime, and monitoring tools
- Simplify information sharing, internally and externally, with Instant Portal
- Runs on Windows and Linux
- Single-click install
