

EasyGuard™ Features At-A-Glance

EasyGuard™ technology incorporates hardware and software innovations into various Toshiba notebooks that address the most common security, reliability and connectivity issues faced by business users. It's the culmination of all the years Toshiba has spent designing and refining mobile PCs. That experience allows us to anticipate the problems users are most likely to experience with a notebook and offer solutions that either prevent these problems or at least make it easier to deal with them if they do happen. These solutions are offered through the four elements of Toshiba's **EasyGuard** coverage: **Protect & Fix**, **Secure**, **Connect** and **Optimize**.
