

The CDW-G Extranet: Favorites

# Save Time and Promote IT Standards

with Organization and Personal Favorites

## Organization Favorites

Organization Favorites are links which are posted to your organization's extranet home page, the My Account page. Organization Favorites are available to everyone who has access to your organization's extranet and are maintained by users with administrative rights. Log on to your extranet today to:

- Share product preferences and standards across an organization.
- Post a list of preferred items.
- Save comparison charts so they may be shared and used again.
- Create bundles containing products typically purchased together.
- Post links to key online destinations such as manufacturer websites.

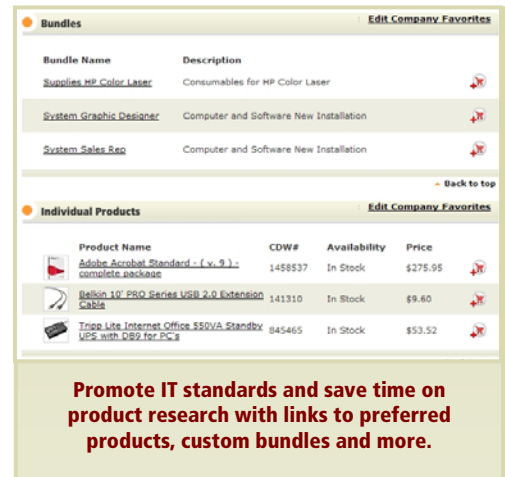

## Personal Favorites

Personal Favorites are links which are posted to an individual's personal view of your organization's extranet home page, the My Account page. Personal Favorites are set by an individual and available just for them. Use Personal Favorites to:

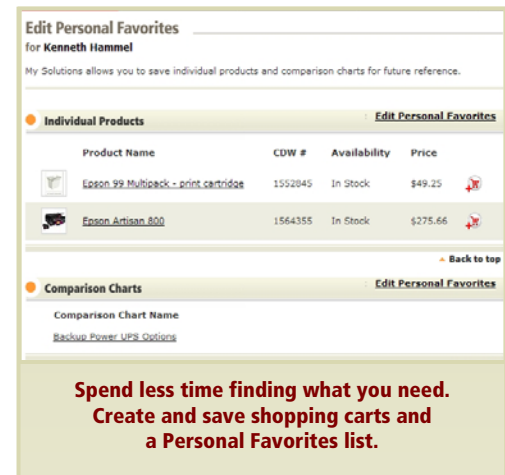

- Keep favorite and frequently-purchased products close at hand.
- Save a list of frequently-referenced products.
- Save comparison charts so they may be shared and used again.
- Create and save and shopping carts for quick and easy repurchasing.
