

DEFEND AGAINST THE UNPREDICTABLE.

CDW RANKS #1 IN CUSTOMER SERVICE ON THE 2010 ILTA MEMBER TECHNOLOGY PURCHASING SURVEY.

Every ILTA Member Technology Purchasing Survey includes an open-ended question about technology vendors who provide exceptional customer support. For the second year in a row, CDW received the most unsolicited mentions compared to other vendors.

KEEP YOUR FIRM UP AND RUNNING

When any sort of catastrophe derails business as usual, it's important to get things back on track as quickly as possible. And without proper, advanced planning, this becomes more difficult and more time-consuming. To avoid costly downtime, you need to make sure your firm has a solid business continuity plan. This is where your CDW Legal Sales team can help.

WE GET BUSINESS CONTINUITY

At CDW, we know how critical it is for your firm to stay up and running no matter what. That's why we'll work with you to ensure that you get a business continuity solution that meets the needs of your firm. One that's reliable, scalable and affordable.

KEY COMPONENTS TO SOUND BUSINESS CONTINUITY

BACKUP

When it comes to business continuity, backup isn't optional. In fact, it's the only way you'll ever see your data again after a disaster. And even if your firm miraculously manages to avoid disasters, having the right backup system in place can reduce storage costs, improve operational efficiencies and increase productivity.

ARCHIVING

Even after you've closed a case, you may have to hold onto your files to stay in compliance. Archiving allows you to create data retention policies that ensure the proper storage of relevant casework as well as deletion of that data when it is no longer needed. During an e-discovery process, searches can also be performed easily and relevant files can be locked to prevent deletion or alteration.

DISASTER RECOVERY

System failures, security breaches, human errors and natural disasters can all cause unplanned downtime. To resume normal operations, it's important that you can quickly restore your firm's systems and data. A proper disaster recovery plan ensures that mission-critical systems remain available with minimal to no disruptions, and less critical applications are back online within a predetermined recovery point and recovery time objectives. With a plan like this in place, your firm will be able to protect its reputation for reliability, allow for continuous productivity and mitigate the risk of financial loss by remaining up and running.

Data Robotics DroboPro™ FS

All new in a very big way

CDW 2196672

\$1995.99

- Share your data on a Gigabit Ethernet network
- Simple data backup
- Network redundancy built in and automatic
- Mix-and-match capacities, disk brands and speeds

EMC® VNXe3100

Delivers industry-leading innovation and simplicity for file and block storage

CDW 2286657

Call for pricing

- Simple, application-driven approach to managing shared storage makes the VNXe series ideal for IT managers and application administrators with limited storage expertise
- EMC Unisphere™ enables easy, wizard-based provisioning of storage for Microsoft Exchange, file shares, iSCSI volumes, VMware®, and Hyper-V™
- Built-in efficiency capabilities, such as file deduplication with compression and thin provisioning, result in streamlined operations and can save up to 50% in upfront storage costs

NetApp® FAS Storage Solution

Storage that lets you do more with less

Call for pricing

FAS2020 shown

With a NetApp® unified storage solution, you can immediately lower storage costs and reduce administrative overhead. Storage efficiency, reliability and scalability are built into every solution. With the NetApp FAS2000 or FAS3100 system, you can meet your firm's growing file, application and virtualization data needs while reducing the storage needed by up to 50%.

- Efficiency comes standard with features like integrated deduplication and flexible provisioning
- Simultaneously support FC SAN, iSCSI and NAS scaling from 2TB to hundreds of TB
- Improve data protection with NetApp SnapShot™ technology and RAID-DP®
- Easy to deploy and manage with NetApp System Manager and SnapManager® suite
