

THE WAITING GAME.

SOLVED.

COUNSEL YOU CAN COUNT ON.

For busy law firms implementing, maintaining and securing a wireless network with minimal IT staff can be challenging. That's where we can help. Our Legal Sales Team is dedicated exclusively to serving the needs of law firms. And when it comes to your wireless network, we know how to customize a solution that can deliver improved workflow and increased flexibility across your firm. From strategy, implementation and beyond, we're here for you. Our team of industry-certified solution architects will help you build a robust wireless network that's also cost-effective and secure. And once it's in place, we'll make sure you continue to enjoy the freedom it delivers.

**GET MOVING AT

ACCESS GRANTED

**A constant connection keeps your workers productive.
A secure connection keeps your network safe.**

Your firm keeps people moving. You have to keep them connected. We get it. And we've helped thousands of law firms implement mobility solutions that help boost communication and collaboration.

Lawyers are constantly on the go, spending more time away from the office than ever before. Conducting legal research from home. Litigating in courtrooms. Leading client depositions in remote locations. And because of this increased mobility, it's tough for them to keep up with e-mails, documents and piles of casework.

LESS THAN 1%

of lawyers spend all of their time at the main office.

When mobility is the rule rather than the exception, your firm can't risk sitting idly by. Your clients are mobile. Your attorneys are mobile. And they wouldn't have it any other way. Delayed communications can cause client dissatisfaction, financial loss and postponed decision-making. Mobility allows for communication practically anywhere, at any time. It helps keep your clients happy, as well as your attorneys, and it can save you money along the way. By laying the right foundation, your associates can have the wireless performance they expect – and the security they need – to stay productive wherever they are.

For busy lawyers who spend a lot of time away from the office, a robust wireless network isn't a nice to have – it's a must have. We get it. It's why our solution architects have the knowledge to help you implement a wireless solution that ensures your firm's performance isn't hampered when associates are away from the office. Working with top vendors like Cisco, Aruba and Netgear, we can customize a solution that allows you to provide far-reaching accessibility, security and access for your firm.

The end result? Lawyers can work quickly and easily away from the office. Just the same as if they were there.
