

**MORE EFFECTIVE  
COMMUNICATIONS.**

**SOLVED.**

### 3 YEARS RUNNING CDW RANKS AT THE TOP IN CUSTOMER SERVICE

Every ILTA Member Technology Purchasing Survey includes an open-ended question about technology vendors who provide exceptional customer support.

For the third year in a row, CDW received one of the most unsolicited mentions for a vendor providing exceptional customer support.

When it comes to VoIP, we get that you've wanted to make the switch for awhile. What's more, we get why you haven't done it yet. After all, consolidating all of your telecommunications into one solution can be a complex, time-consuming process. Thankfully for you, we know how to make this happen.

By streamlining all of your communications over one system, you'll be able to connect with coworkers quickly and easily, no matter their location. Our IP/telephony solutions will ultimately provide you a more effective way to communicate by merging your existing communication systems, such as e-mail or instant messaging. In doing so you'll not only get a seamless communications experience, but also reduced costs and increased efficiency.

### WE TAKE YOUR IT NEEDS SERIOUSLY.

CDW's telephony and security solution architects take care of your IP telephony needs. We'll start with an upfront audit to determine whether your network can support the bandwidth required by additional video, what security enhancements are needed for introducing mobile technology to remote staff and any additional infrastructure updates required. And by helping you implement a telephony solution, we'll help make your everyday communications easier to manage. If you need help with carrier services, mobile activation or contract renewals, you only need to make one call – to your CDW Legal Sales Team.

### STAY CONNECTED WITH HELP FROM PEOPLE WHO GET IT

When you're ready for VoIP, we can help you make that happen. And not just with the latest IP telephony technology, but with the right technology for your firm. You need people that understand your limited staff, resources and budget. People who know how to do more with less. You need people who get IT.
