

Trend Micro™

InterScan™ Messaging Hosted Security

Stop spam before it reaches your network

Increases in spam and email-based attacks continue unabated. These assaults not only hurt employee productivity, they consume valuable IT staff time and infrastructure resources. These threats can also expose confidential data and open organizations to compliance issues and legal risks. To be successful in challenging economic times, you need reliable security that protects your email and data at a lower cost.

Trend Micro's top-rated hosted email security solution stops spam, viruses, phishing, and other email threats before they reach your network, helping you reclaim IT staff time and end-user productivity. It includes unlimited email scanning capacity, and optional content filtering and identity-based encryption to help enable regulatory compliance and better control confidential data.

As a SaaS (Software as a Service) solution, it requires no hardware to install and maintain, even as email volume grows over time. In addition, Trend Micro's worldwide team of experts manages all updates and application tuning to continuously optimize security and performance, and meet the commitments of a contractually-binding Service Level Agreement.

KEY FEATURES

Industry-leading antisпам

- Stops up to 99% of spam and rated #1 in independent benchmarking¹
- Based on the world's largest reputation database which tracks millions of malicious IP addresses
- Correlates threat data in real-time for always up-to-the minute protection against new spam sources and malware
- Stops global spam threats with multi-lingual spam detection and blocks bulk mail attacks

Award-winning antivirus and antispysware

- Powered by Trend Micro™ Smart Protection Network for zero-day protection against unknown threats
- Stops targeted, email-based spyware attacks
- Prevents users from visiting websites with malicious downloads by blocking spam with bad URLs
- Automates recommended malware responses with ActiveAction antivirus technology

Easy deployment and management

- Provides up to 10x return on investment over on-premise email security solutions²
- Reduces costs with no hardware or maintenance required
- Enables rapid deployment with simple redirect of the MX record
- Simplifies management with message tracking, detailed reports, and end-user quarantine

Robust content filtering (Advanced option)

- Protects confidential data and helps enable regulatory compliance with optional content filtering and hosted identity-based encryption
- Identifies content by attachment characteristics, keywords, lexicons, and customized data rules
- Allows flexible policies that target senders or recipients by company, group or individual

AVAILABILITY AND EFFECTIVENESS BACKED BY MONEY-BACK COMMITMENT

Trend Micro provides an aggressive Service Level Agreement (SLA)³ for InterScan Messaging Hosted Security to enable secure, uninterrupted email with money back if Trend Micro fails to deliver. The SLA covers availability, email delivery latency, spam-blocking effectiveness, false-positive rates, email-based antivirus protection, and support responsiveness.

IMPLEMENTATION OPTIONS	Standard	Advanced
SLA for 100% availability	✓	✓
Inbound email and attachment threat filtering	✓	✓
Outbound email and attachment threat filtering		✓
Customizable threat policy management		✓
Content filtering rules		✓
Email Encryption option		✓

EMAIL PRIVACY

Trend Micro understands that a number one concern for customers is maintaining the privacy of their email. In keeping with this, InterScan Messaging Hosted Security has been purpose-built with email privacy in mind. Customer emails are never stored for scanning purposes, and are processed without human intervention. Privacy and security are further assured through the following data center certifications.

North America:

- SAS 70 II
- ISO 9001
- Sys Trust

Europe:

- BS7799
- ISO 9001
- BSI Grundschutzcertifikat

TREND MICRO SMART PROTECTION NETWORK

InterScan Messaging Hosted Security is powered by the Trend Micro Smart Protection Network which correlates threat intelligence in the cloud, across multiple threat vectors. Each new threat identified via a single customer's routine reputation check will automatically update databases around the world. Trend Micro Smart Protection Network delivers security that's smarter than conventional approaches by blocking the latest threats before they reach you. Leveraged across Trend Micro's solutions and services, the combined cloud-client architecture of the Smart Protection Network immediately and automatically protects your information wherever you connect.

EXPAND YOUR PROTECTION
