

MANAGING IT INVESTMENTS

Keep an Accurate Eye on Your Investments

CDW Hardware Asset Management

Well-suited for departments, workgroups, or small businesses, our Asset Management function is a straightforward feature equipped with functions that make it easy to keep track of your hardware investments.

- Search your purchase history for assets that have CDW asset tags by product category, date, order number, asset tag ID, serial number, CDW part number, location, or manufacturer.
- Key in asset management information for assets purchased elsewhere or those without CDW asset tags.
- Download all of your asset records for integration with other applications. You choose the date range and data format (e.g. tab, comma, or quote-delimited text).
- Add custom fields to the Asset Tracking feature to meet your particular needs. This option is limited to extranet users with Administrator rights.

Use the CDW Hardware Asset Management tool to keep an accurate, up-to-date inventory of your purchases for budgeting, to avoid duplicate purchases, to plan for refreshes and upgrades, and to standardize the products your organization uses.

About CDW Asset Tagging

CDW offers customized Asset Management services allowing you to easily identify products.

Asset tags are applied at a configuration center before they are shipped to your organization.
