

# MANAGING IT INVESTMENTS

## Keep an Accurate Eye on Your Investments

### CDW-G Hardware Asset Management

Well-suited for departments, workgroups, or small businesses, our Asset Management function is a straightforward feature equipped with functions that make it easy to keep track of your hardware investments.

- Search your purchase history for assets that have CDW-G asset tags by product category, date, order number, asset tag ID, serial number, CDW-G part number, location, or manufacturer.
- Key in asset management information for assets purchased elsewhere or those without CDW-G asset tags.
- Download all of your asset records for integration with other applications. You choose the date range and data format (e.g. tab, comma, or quote-delimited text).
- Add custom fields to the Asset Tracking feature to meet your particular needs. This option is limited to extranet users with Administrator rights.

Use the CDW-G Hardware Asset Management tool to keep an accurate, up-to-date inventory of your purchases for budgeting, to avoid duplicate purchases, to plan for refreshes and upgrades, and to standardize the products your organization uses.

### About CDW-G Asset Tagging

CDW-G offers customized Asset Management services allowing you to easily identify products.

Asset tags are applied at a configuration center before they are shipped to your organization.
