

# SOFTWARE LICENSING SIMPLIFIED

## Maximize Your Software Investments

Take advantage of features that make it easy to find, download, activate, and manage software licenses.

### CDW-G Software Asset Management—Discover and Analyze

- Audit every software application running on your network.
- Instantly run inventory of your software assets.
- Analyze software usage.
- Automatically find all IT assets.
- Monitor network vulnerabilities.
- View comprehensive asset reporting and more.
- Learn more at [CDWG.com/SAM](http://CDWG.com/SAM)

### Software Filters—Make License Purchases Easy

- Quickly narrow purchase options based on your current software contract.
- Available for Microsoft, Adobe, or Symantec titles.
- Feature may be added to an existing extranet or activated during initial setup.

### Software Downloads and Keycodes

- Download Microsoft Select Media
- Access Microsoft Select and Adobe CLP keycodes to activate software licenses.
- Use Software Keycodes to store keycodes from software licensing purchases.
- Feature may be added to an existing extranet or activated during initial setup.

### Software License Tracker—Track Licenses Purchased from CDW-G

- Robust standardized and custom reporting options.
- Option to upload license information so you can consolidate software license reports and information.
- Feature may be added to an existing extranet or activated during initial setup.
