

PROFESSIONAL NETWORKING SERVICES: IT'S WHAT WE DO.

WHY DO AN ASSESSMENT?

Your CDW Canada Account Manager and certified solution architects are ready to assist you with every phase of choosing and leveraging the right solution for your network. Our professional networking services can help you:

- Understand your network (Inventory)
- Verify the current lifecycle (end of sale, end of life, end of support)
- Identify software vulnerabilities (PSIRT)
- Align your companies business goals with network strategies
- Develop and forecast a budget
- Identify potential issues and roadblocks to success: configurations, design, future features and pain points
- Provide estimate of wireless coverage

WE'VE GOT THE PLAN.

CDW CANADA NETWORK ASSESSMENT SERVICES ARE AVAILABLE AND CAN HELP YOU JUMPSTART YOUR NEXT NETWORK OPTIMIZATION PROJECT.

Data Network Roadmap: A service that covers the assessment and design phases of your new solution, providing insights that lead to optimized performance.

Wireless Site Surveys: Performed on-premises or offsite to determine optimal access point placement for complete wireless coverage.

QoS Roadmap: A roadmap to deploy or tune quality-of-service that ensures voice, video, desktop and data center traffic all operate efficiently across your enterprise.

IPv6 Readiness Evaluation: Assessment of your network's ability to handle the most recent IP revision (we also offer IPv6 planning workshops and design services).

Network Inventory: A basic assessment to capture hardware model numbers, end of life/support statuses and firmware version levels.

4WVfe,

- Evaluate network performance
- Evaluate network security
- Inventory & validate networking gear
- Determine the currency of the network infrastructure and identify inefficiencies
- Eliminate any unnecessary equipment or redundant connections for a smoother operation
- Proactively identify any risks or threats to the network
- Proactively mitigate those risks to avoid network outages or breaches

6WVhVSTVt,

- Fixed Fee Network Assessment Engagement
- Network Assessment Reports
- Network Performance Reports
- Network Diagrams
- Consolidated Remediation Action Items

ACCOUNT MANAGERS

Our account managers are your main point of contact, they have an understanding of your particular business needs. And because they are trained on new CDW network services offerings, they'll guide you toward the networking experts and services that best meet the needs of your organization.

NETWORK SOLUTION ARCHITECTS

These highly trained specialists gather information about future networking trends and share them with each other daily. This way, when you need a cutting-edge networking plan, they're ready to design it. Once they've met with your IT team to assess your unique business needs and goals, they'll help you design a comprehensive solution.

NETWORK DELIVERY SERVICES

We have the best engineers for our onsite implementation team and the engineers assigned to your project are selected based on their expertise, background and the custom needs of your organization. Meanwhile, our project managers ensure that timelines are met while supervising and monitoring budgets.
