

# ONLINE BACKUP SOLUTIONS

# IT'S WHAT WE DO.

CDW Canada can offer a quick, easy and secure automated online backup solution to your valuable, irreplaceable data. From implementation to training and support, we guide you through every step of your backup optimization investment.

## WE'VE GOT THE PEOPLE.

**ACCOUNT MANAGERS** – A single point of contact dedicated to understanding your unique needs. The CDW Canada account team can help you find the right storage solution for your organization.

**SOLUTION ARCHITECTS** – Our solution architects have a deep understanding of the storage landscape and can help you select and design the best storage solution for your organization.

**SERVICE ENGINEERS** – With years of experience, they can guide you through any of our storage assessments or solutions and answer all of your questions. They also support your needs throughout the entire lifecycle of your purchase.

## WE'VE GOT THE PLAN.

CDW Canada is here to help with expertise and support during every phase of your backup solution.

### No New Hardware Required

- Quick and easy add-on to any critical business environments
- Software based service
- Requires the installation of tiny agents on each guest operating system that has data to be backed up

### Flexible Retention Settings

- With this service, CDW Canada will design proper and flexible customized retention schedules that will fit your requirements
- These retention schedules can be server or data type specific

### Secure and Protected

- Strong policies and security in place to ensure that your offsite backups and the channel of communication between servers are encrypted and secure.

### Multiple Operating System Support

- Available on various platforms such as Windows, Mac, Linux, and Unix.
- Configuration agents are web based

### Online Portal Access

- Customers will have access to an online portal to view and report against backup jobs and selections
- Real time access

### 99.9% Availability

- This service will rarely experience outages and ensure that in the event of one, data continuity will continue through a replicated and redundant infrastructure.

### Application Specific Agents

- This solution has specific agents for a plethora of services like Microsoft Exchange, Microsoft SQP, Microsoft SharePoint, File servers, Oracle, and many more

### 24/7/365 Monitoring

- Proactive monitoring and management
