

All the power engineers require, and more

Until now there hasn't been any way to get both the flexibility of a tablet and the power to run engineering software. But things have changed. Surface is thin, light, and so powerful that it will run every program on your PC.

That means no more wasted time hustling from the factory floor back to the office to process a heavy-duty calculation. Just open Surface Book, and you'll have total productivity right at hand. Or switch to tablet mode and present a 3D model to a colleague in brilliant HD. The end result? You stay productive and save time.

I'm just blown away at how effective it is as a tool that I can put in my one hand and be able to edit and actually do 3D CAD."

Trlby Innovative

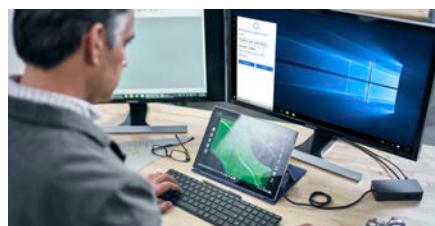

8:00 A.M.

Join the team meeting for production updates, then check manufacturing data in real time. Send a message to your equipment operators, review your task list, and launch your day.

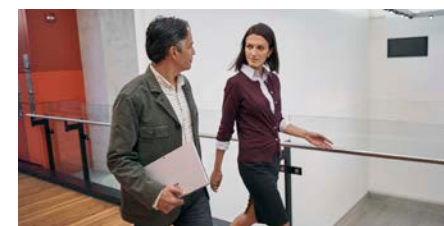

10:00 A.M.

Head out to the factory floor. If you need to modify a design on the fly, you've got all the processing horsepower you need in hand for 3D modeling, CAD applications, and more.

2:00 P.M.

Time to shut the office door and get some focused work done. Dock your Surface and connect to multiple monitors to maximize your productivity.

6:00 P.M.

Catch up with your team leads before they end their day. Surface Pen helps you gather feedback and take notes, and you never have to re-enter information on a desktop device.

See what sets Surface apart

Bright and beautiful

Engage staff with a brilliant, full HD touchscreen

Powerful laptop

Full-sized, backlit keyboard for fast and natural typing

Log on with a smile

With Windows Hello and the Surface camera, you can log on more securely and quickly—no password required

Work from anywhere

Run all the full-featured programs you need on one device—no need for separate tablet-plus-laptop combos

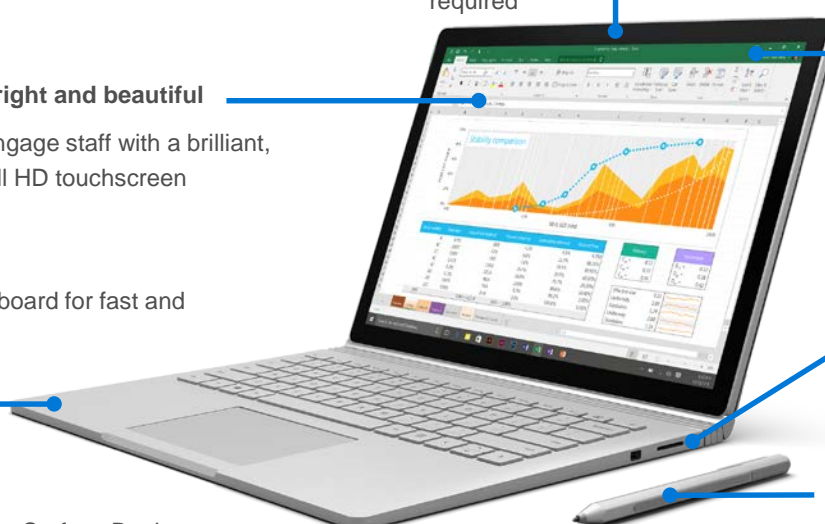

Keep connected

USB, mini DisplayPort, and microSD™ to transfer files, add storage, and more

Make your mark

Sketch, take notes, or revise work with Surface Pen¹

Surface Book

Featured add-ons

Arc Touch Mouse

Designed to conform to your hand, Arc Touch Mouse flattens for easy portability and storage. Connects to your Surface via Bluetooth.

Surface Dock

From ultraportable to ultraproducer: Connect to dual monitors, speakers, a full-size keyboard, and more.

Incipio Feather® Case

Guard your Surface from dings and dents while on the road.

Runs the software² engineers rely on, including:

SOLID EDGE

PowerPoint

Excel

Word

Work with precision

- Manipulate images and flow sheets naturally and efficiently
- Demo 3D designs on a brilliant HD touchscreen
- Shift from tablet to laptop and work however you like

Maximize productivity

- Access all your data and software on one device—reducing downtime
- Power through the day with its long-lasting battery³
- Take searchable, handwritten notes with Surface Pen and OneNote

Improve ROI

- Reduce management costs by having fewer devices
- Manage Surface like any Windows device
- Adhere to existing IT and security protocols
