

Surface for Government

Delivering mobile efficiency in Government

Governments are tasked with providing vital services and security for their citizens. Technology plays an increasingly important role in helping modern governments fulfill these responsibilities. Surface delivers the power of a desktop, the mobility of an ultra-thin laptop, and the convenience of note-taking with paper and pen, helping government employees become more efficient and effective.

Efficient, Connected Productivity

Government employees are responsible for making decisions requiring diverse information sources in real time. Surface allows on-the-go inspectors, investigators, and case managers to take shareable notes, authorize and provide services on-location, and run programs wherever their work takes them.

Capture information in the field such as photos, videos, text, and audio with the Surface HD camera, Pen and mic.

Authorize services and investigations with Pen signatures.

Secure connections to internal resources with VPN and Direct Access.

Case Management

Using Surface, paperwork can be significantly reduced, procedural meetings can be properly documented, and time efficiencies realized. Do away with paper, the Surface Pen opens OneNote for Immediate note-taking and brainstorming in a single location

Enable better access to data and case content with a mobile-friendly device that supports desktop apps. Thin and light for easy portability, stay charged for 9 hours.

Increase transparency with real-time note taking and sharing via cloud services.

Rich collaboration with online annotation, shared field, and live discussions. Remote wipe to secure data when employees leave or devices are lost or stolen.

Investigators and Inspectors

Secure communication and collaboration are crucial to investigators and inspectors. Surface gives government employees the processing power and security they need to stay informed and move forward with their decisions.

Capture information in the field such as photos, videos, text, and audio with the Surface HD camera, Pen and mic. Authorize services and investigations with Pen signatures.

Secure connections to internal resources with VPN and Direct Access.

"With the Surface, it gives employees a full-featured computer that they can use from anywhere...Our biggest challenge now is that everyone wants one so it's hard to keep up with the demand!"

- Cliff Du Puy, Technical Services Director, Mecklenburg County, North Carolina

"We conducted a comprehensive analysis of other products on the market, and we found that Surface devices met our needs best in terms of performance, application compatibility, multitasking behavior, and user experience."

- Marco Sanchez
Network Administrator, City of Miami

Accessories

Docking Station

Transform your ultraportable Surface into a complete desktop workstation in an instant and easily connect to your favorite accessories
