

Trend Micro

Worry-Free Business Security

Rated #1 for Small Business Security

Trend Micro™ Worry-Free™ Business Security Advanced and Standard solutions provide fast, effective, and simple protection against viruses, cybercriminals, and data loss, so you can focus on your business, instead of worrying about Internet security. In independent tests*, Worry-Free Business Security is rated best at blocking threats *before* they reach your computers, file servers, and mail servers.

Businesses with limited IT staff and resources need protection that is designed for them, not huge corporations nor for an individual consumer. That's why Trend Micro offers several easy-to-set-up and use all-in-one solutions to meet the unique needs of these businesses. Worry-Free Business Security solutions provide effective protection with minimal impact on computer performance by leveraging the Trend Micro™ Smart Protection Network™ —the same infrastructure that safeguards all our customers, from Fortune 500 enterprises to millions of consumers.

Worry-Free™ Business Security Advanced protects Windows PCs, Macs, file servers, and mail servers from viruses, threats, and dangerous websites. The latest Advanced edition keeps business information private by locking down USB drives and other storage device as well as preventing data loss through email. Also, it features integrated spam protection on Exchange Servers, and blocks spam before reaching them.

Worry-Free™ Business Security Standard protects Windows PCs and servers from viruses, threats, and dangerous websites. It features security scans that run quickly and quietly in the background and keeps business information private by locking down USB drives and other storage devices.

Key Benefits

Fast

- Powered by Trend Micro Smart Protection Network to identify and block new and emerging threats before they impact your business
- Most updates are stored either on the local server or by Trend Micro, not on your computers to deliver protection without affecting performance or speed
- Virus scans run quietly and quickly in the background so your computers are unaffected

Effective

- Stops viruses, spyware, spam, phishing attacks, and other web threats before they can reach your business machines
- Data loss prevention stops private business information from being shared via USB drives and other attached storage devices as well as in email messages
- Multi-layer antispam for Advanced; POP3 antispam for Standard and Services
- URL filtering prevents employees from visiting inappropriate and infected websites and downloading threats

Simple

- Specifically designed for businesses with limited IT staff and resources
- Easy to install and use, no IT expertise required
- Traffic light dashboard makes security status understood at a glance and supported by easy to read security reports

PROACTIVE THREAT DETECTION AND PROTECTION

The Smart Protection Network correlates databases with behavioral analysis and uses global threat sensors to identify and block viruses, spyware, spam, and other web threats before they reach your business machines. It's a lot like having a global neighborhood watch group, keeping a vigilant eye on your business.

"For us, Trend Micro Worry-Free Business Security is easy to manage and we worry less about threats..."

Rahul Chawla

Operations Manager, TECHNOWAND

New Features in Version 7

Device Control

The newest version of Worry-Free Business Security now controls access to USB drives and other attached devices to prevent data loss and block threats.

Email Data Loss Prevention*

Worry-Free Business Security Advanced prevents the loss of information sent out via email, whether the attempt is deliberate or unintentional.

Mac Computer Security*

In addition to PC security, the Advanced edition provides integrated protection for Mac clients (iMacs and MacBooks) and servers, without needing to purchase and manage additional solutions.

Reduced Footprint, Improved Security

The current version of Worry-Free Business Security provides customized installation options, so you only get the security you need. With continuous updates, the majority of which are stored on the local security server – not on your business computers – the newest threats are blocked faster, while reducing the impact on your computer performance.

Solution Comparison

² WFBS Services URL filtering capabilities differ from Advanced and Standard.

³ For more information refer to the WFBS Services datasheet.

³ No server software or hardware required.

SYSTEM REQUIREMENTS

Worry-Free Business Security Advanced

Operating System:

Clients: Windows XP, Vista, 7

Macs*: Mac OS X Server, Snow Leopard™, Leopard™, Tiger™

Windows Servers: Server 2003 and 2008, Storage Server 2003 and 2008, Server 2008 Foundation, Home Server, SBS 2003 and 2008, EBS 2008

Email Servers*: Exchange Server 2003, 2007, 2010

Processor:

Clients: Intel Pentium x86 or compatible; x64: AMD64, Intel EM64T (clock speed varies depending on OS)

Macs*: PowerPC™ or Intel™ core
Security Server: Conventional scan mode: Intel™ Pentium™ 4 or higher; Smart Scan mode: Intel Core 2 Duo™ or higher recommended

Email Server*: 1GHz Intel Pentium x86 or compatible; 1GHz x64 (AMD64, Intel EM64T)

RAM:

Clients: 256MB; 512MB recommended

Macs*: 256MB

Security Server:

- Smart Scan mode: 1GB; 2GB recommended
- Conventional mode (x86): 512MB; 1GB recommended
- x64 (Smart and Conventional): 1GB; 2GB recommended
- Windows EBS 2008 or SBS 2008 (Smart and Conventional): 4GB

Email Server*: 1GB

Disk Space (8.05 GB total):

Clients: 500MB

Macs*: 30MB

Security Server: 5GB (not including Agents)

Mac Server Plug-in: 1.5GB

Email Server*: 1.5GB
