| Standard                          | NAT: static, dynamic, 1:1, IPSec traversal, policy-based PAT / Traffic shaping and QoS: 8 priority queues, DiffServ, modified strict queuing / IP address assignment: static, DynDNS, PPPoE, DHCP (server, client, relay) / Port independence / VLAN support / VPN failover / WAN failover+ / Multi-WAN failover+ / Transparent/drop-in mode  |          |              |  |              |              |                  |              |                           |  |              |              |                         |
| Advanced OS                       | WAN failover / Multi-WAN failover / Multi-WAN load balancing / Policy-based routing   |          |              | High availability (active/passive, and active/active for clustering) / Dynamic routing (OBG, OSPF, RIPv1,v2) / Policy-based routing / Multi-WAN load sharing / Multi-WAN load balancing / Virtual IP for server load balancing |              |              |                  |              |                           |  |              |              |                         |
| Management Software               | All WatchGuard XTM appliances and all Firebox X Edge, Core, and Peak e-Series appliances can be managed with the user's choice of: command line interface with direct connects and scripting, web UI for access to management tools from anywhere, and WatchGuard System Manager (WSM) / WSM provides interactive real-time monitoring and logging for network-wide system status at a glance / Includes drag-and-drop VPN creation and rich historical reporting |          |              |  |              |              |                  |              |                           |  |              |              |                         |
| Logging and Reporting             | Multi-appliance log aggregation / HTML and PDF reports / SQL log database / Encrypted log channel / SNMP v2 & v3 / Syslog   |          |              |  |              |              |                  |              |                           |  |              |              |                         |
| <b>Support and Maintenance</b>    |   |          |              |  |              |              |                  |              |                           |  |              |              |                         |
| LiveSecurity® Service             | Firebox X appliances have initial 90-day or 1-year LiveSecurity subscription; renewable in 1-year, 2-year, and 3-year subscriptions / Provides hardware warranty with advance hardware replacement, software updates, technical support with targeted 4-hour response time, and threat alerts – Gold-level service available for 24/7 support with 1-hour response time   |          |              |  |              |              |                  |              |                           | WatchGuard XTM appliances have initial 1-year, 2-year, and 3-year LiveSecurity subscriptions available – Gold-level service available for 24/7 support with 1-hour response time |              |              |                         |

\*All Edge appliances are available in a wireless version, under the model numbers X10e-W, X20e-W, and X55e-W \*\*Throughput rates will vary depending on environment and configuration \*\*\*Firebox X Peak 8500-e is also available with fiber interface support under model number X8500e-F

†Available with upgrade to Fireware XTM Pro advanced OS † X10e, X10e-W, X20e, and X20e-W models require upgrade to Fireware XTM Pro

## WatchGuard Security Appliances

When companies need proven firewall and network security solutions, they turn to WatchGuard. We provide excellent reliability, service, support, and innovation for our customers, with a range of products to suit specific business requirements.

### WatchGuard® XTM 1050

**Headquarters/Data Centers - up to 10,000 users**

The XTM 1050 is a high-speed network security appliance that delivers enterprise-grade performance and protection at an affordable price. 10 Gbps firewall throughput and 12 Gigabit Ethernet ports combine with advanced networking features including clustering and high availability (active/active) to handle high-volume network traffic securely. Includes a suite of flexible management tools that allows IT administrators to manage security through an intuitive centralized console, a command line interface, and web UI.

### WatchGuard® XTM Series 8

**Main Office/Headquarters - up to 5,000 users**

XTM 8 Series appliances are part of our growing family of WatchGuard XTM solutions that deliver a new class of performance-driven security. With up to 5 Gbps firewall throughput and 10 Gigabit Ethernet ports, these solutions provide flexible management tools and advanced networking features for maximum efficiency and network uptime. Model upgradeability ensures the best ROI in the industry.

### Firebox® X Peak™

**Main Office/Headquarters - up to 1,000 users**

Firebox X Peak is the high performer of our Firebox X family of appliances, with up to 2.3 Gbps firewall throughput and eight Gigabit Ethernet ports. It combines strong security, efficient management tools, and advanced networking features for the threat protection and reliability a mid-size network requires.

### Firebox® X Core™

**Small & Mid-Size Regional Offices - up to 300 users**

Firebox X Core UTM solutions are ideal for growing businesses. Easily upgrade to a higher model in the line for more capacity and performance, move up to an advanced OS, and add powerful security subscriptions with simple license keys.

### WatchGuard® SSL 100

**Anytime, Anywhere Access Appliances**

The WatchGuard® SSL 100 is an affordable, easy-to-use secure remote access appliance that provides reliable client and clientless connectivity to corporate data and resources, so users stay productive from anywhere, anytime.

### Firebox® X Edge

**Small & Branch Offices, Wireless Hotspots - up to 55 users**

Firebox X Edge is a stand-alone firewall and VPN security appliance for small businesses, remote offices, and telecommuters. Available in both wired and wireless versions, it's the ideal endpoint solution for connecting a secure VPN tunnel back to a WatchGuard XTM or Firebox X appliance.

### 3G Extend

**Cellular Connectivity for WatchGuard Appliances**

It's easy to add 3G wireless connectivity to a Firebox X Edge appliance to maximize equipment uptime and ROI with this handy accessory.

## The WatchGuard® Story

Since 1996, WatchGuard Technologies has provided more than half a million security appliances to hundreds of thousands of customers worldwide. The award-winning WatchGuard Firebox X family of unified threat management (UTM) security appliances delivers the industry's best combination of strong, multi-layered security, high performance, and expert guidance and support. Our newest family of products – WatchGuard® XTM – provides fully extensible, enterprise-grade network security at an affordable price, while our WatchGuard® SSL appliances allow secure remote access from anywhere, anytime. All products are backed by LiveSecurity® Service, a high-value support and maintenance program. The WatchGuard commitment to performance and value gives our customers enterprise-grade protection in a cost-effective, extensible solution.

### Boost Protection in Critical Attack Areas

WatchGuard firewalls are built on robust "Layer 7" content inspection technology, which is fundamentally more secure than stateful packet filtering. Integrated security subscriptions deliver even more layers of protection, without requiring additional hardware purchases. Subscriptions include:

- **spamBlocker** with virus outbreak detection
- **WebBlocker** for URL filtering on HTTP and HTTPS
- **Gateway AntiVirus** with anti-spyware
- **Intrusion Prevention Service** to block attacks that comply with standard protocols but carry malicious content

### Buy the Bundle and Get the Works

The easiest, most cost-effective way to have complete network protection is with the UTM Bundle. An exceptional value, the Bundle includes:

- Choice of WatchGuard XTM or Firebox X appliance
- Full suite of security subscriptions\*
- LiveSecurity Service\* for support and maintenance

\*One-year, two-year, and three-year subscription packages available

### Easy to Upgrade

As business needs grow, it's easy to protect your security investment. Add new capabilities to enhance protection or upgrade to a higher model in the line for more performance or capacity using a simple downloadable license key.

### Expert Guidance and Support

LiveSecurity Service from WatchGuard provides technical support with a targeted four-hour response time, and a hardware warranty that covers advance hardware replacement. It includes free software updates so code is always up to date. Concise threat alerts are delivered with clear instructions on how to reduce or eliminate new threats and link directly to vendor patches to save time. Ground-breaking security education tools include videos and podcasts. No other security vendor does as much to educate customers in the role of security-savvy network administrator.
