

CDW Microsoft Exchange Deployment Planning Services (EDPS)

Maximize Your Software Investment

Microsoft®

CDW helps customers maximize their software investment through our licensing and solution expertise, personal customer service and strong Microsoft relationship. With deep implementation experience in Microsoft Server and Security, Monitoring and Management, Information Worker and Unified Communications experience, CDW is the right partner for delivering Microsoft solutions.

We offer a comprehensive system of communication and collaboration solutions to help keep staff connected. Our platform delivers a people-centric, intuitive and efficient solution into the backend server environment, and we offer complete telephony services to our customers. These systems leverage converged network infrastructure to achieve a dramatic return on investment.

As a part of an elite group of Microsoft Gold and Managed Partners worldwide, CDW is strategically positioned to deliver real business solutions with a unique expert perspective. CDW built a team of certified consultants with Microsoft expertise who can deliver a complete solution to help customers grow their business and stay on the cutting edge of technology.

Exchange Deployment Planning Services (EDPS) from CDW is a national service offering that is designed to help your organization plan an effective deployment of Microsoft Exchange Server 2007. EDPS includes a broad range of planning tools and services that can help optimize Exchange Server 2007 core capabilities, lower the cost of deployment and improve the productivity of your organization. CDW will share best practices, analyze your organization's IT environment and provide the tools and services to help you plan your Exchange implementation from start to finish.

CDW offers EDPS in 3-, 5-, 10- and 15-day engagements. Each engagement is designed to deliver maximum impact to your organization through the use of trained experts in Exchange deployment services. At the end of the engagement, you will have a customized roadmap for your unique environment that includes a comprehensive business plan, timelines and resources to help you successfully transform your collaborative processes by using Exchange Server 2007.

CDW's EDPS offering, depending on your agreement, can include:

- Discovery Session
- Strategy Briefing
- Exchange 2007 Technical Sessions
- High-Level Deployment Roadmap
- Hands-On Virtual Lab
- Vision/Scope Document and Conceptual Architecture

EDPS dramatically reduces the amount of issues and conflicts your business could experience during an initial company-wide deployment, which frees up time for your IT staff to concentrate on other business-critical issues. As a trusted name in providing technology solutions, CDW has both the years of experience and the relationship with Microsoft to ensure that best practices are followed throughout your deployment plan. Upon contacting CDW for an EDPS engagement, your business will see a dramatic increase in user productivity, a lower total cost of ownership and an improved return on your software investment.

With CDW's expertise in product, services and licensing, you can maximize your software investment by deploying what you own and ensuring you are getting the total benefit out of your solution purchase. We strive to ensure our customers can lower their total cost of ownership and enjoy all the benefits of their Microsoft solutions. We have the passion, commitment and resources to take service to the next level of customer responsiveness — delivering IT business solutions.

Call your CDW account manager or visit CDW.com/microsoft to learn how EDPS can bring your business to the next level.
