OPTIMIZED FOR

Microsoft®
Office Communicator

See what Microsoft® webcams can do for your employees.

- + Increase productivity
- + Minimize travel budget
- + Reduce carbon emissions through less travel

Microsoft®

Communicate with your coworkers in real time

More than 33 million Americans telecommute for work at some point during the month. A webcam can facilitate video meetings with colleagues across the country or the globe.¹

By offering face-to-face communication opportunities, a webcam can help to **mitigate miscommunication**, **lower travel expenses**, and **reduce your business's carbon footprint**.

Imagine conferencing across different time zones with multiple people without the high cost of traveling.
