

# VMware vSphere Optimization Assessment

## Virtualization has evolved: solve your productivity problems

Let us show you how to increase your IT efficiency with the free vSphere Optimization Assessment. It's time to explore the next evolution of virtualization. With our expert help, you can:

- Cut time to problem resolution by 26%
- Spot over-provisioned VMs and cut IT admin costs
- Save up to 30% on hardware by increasing capacity utilization
- Easily predict and respond to future business needs

## What is the vSphere Optimization Assessment?

The vSphere Optimization Assessment is a 30-day trial that allows you to evaluate VMware® vSphere™ with Operations Management™ or VMware® vCenter™ Operations Management Suite™. We will install the software, monitor and collect data for a few weeks, at no cost to you. We then compile findings and recommendations for you in a personalized master assessment report.

## Get Your FREE Customized Optimization Assessment Report

At the end of the trial, we will present you with your customized vSphere Optimization Assessment Report. This 20-page report will clearly illustrate how you can improve your virtual environment's Efficiency, manage Risk and improve Health.

**Health**  
Immediate issues

**Risk**  
Future issues

**Efficiency**  
Optimization opportunities

This visibility will allow you to proactively ensure service levels, optimize resource usage, and proactively manage your dynamic virtual and cloud environments. Instead of reacting to problems, you are able to solve them before they happen. **A report like this can be billed at over \$1000 and we are offering it to you at no cost** because we want to show you the power of VMware Operations Management.

Let us show you how the vSphere Optimization Assessment can enable your IT organization to quickly start increasing capacity, performance and savings.
