Empowering a workforce in motion

This is a story about getting the job done. About integrating technology that changes how and where we work. About connecting with the right co-workers at the right moment and communicating with anyone, from anywhere, at any time.

It's also about the **value** of working together. Mobile collaboration can **drive innovation** like no other enterprise initiative. **Do your workers have what they need to make it happen?**

The Flex Worker

Always adjusting to different environments. In a state of constant change.

Challenges:
- Affected by background noise while on calls
- Collaborating with colleagues in different places
- Missing important information while working remotely

The Road Warrior

Always on the go. Constantly in motion. Needs to connect from anywhere.

Challenges:
- Communicating in demanding audio environments
- Poor call quality on conference calls
- Trouble getting connected while on-the-go

The Connected Executive

A critical decision-maker. Goes wherever needed to solve problems.

Challenges:
- Staying connected across all devices
- Hard to hear/understand people on calls as a remote participant
- Distracted by background noise while on calls

Savi 400 Series
- Ability to move throughout your home or home office on calls
- Microphone blocks background noises in your environment
- Block interference from appliances and Wi-Fi networks
