

# GET YOUR HEAD IN THE CLOUD. WITH CDW.

When it comes to collaboration and productivity for today's everything, everywhere workforce, cloud is a business necessity, not an option. **Yet, how do you master cloud's complexity?**

CDW brings cloud down to earth: business-focused solutions from the industry's most knowledgeable people. Think cloud, think CDW.

## Be more collaborative

Email and instant messaging. Virtual document editing. Video and web conferencing. File sharing. Help teams stay connected from wherever, whenever – in real time – with software already familiar to almost everybody.

### THINK CDW

We'll help you build a unified, secure, flexible communications platform based on how your users work and collaborate. For a truly frictionless experience, we'll help you integrate multivendor platforms through their application programming interfaces (APIs).

## Be more productive

Optimize everybody's time with tools that work faster and more efficiently, wherever your people are, whatever mobile device they choose.

### THINK CDW

We'll start by understanding what tools and capabilities your workforce requires. We'll then use our relationships with top enterprise Software as a Service (SaaS) providers to optimize solutions.

## Migrate easily

Are you integrating apps, deploying new ones – or both? Is your wide area network (WAN) up to the accessibility and availability demands of bigger workloads? Can you meet new applications' appetite for bandwidth? Where and how large is your user audience? A knowledgeable migration strategy is essential.

### THINK CDW

We know migration. We'll evaluate your current needs, understand which workloads make sense to move to cloud and which to keep in-house. We'll provide detailed implementation procedures for migration to keep traffic moving, with the high-speed access users expect.

## Stay secure

Security is the No. 1 concern about cloud. Whether you need cloud-based identity and access management – or any other security focus – your provider should have expertise in all of it.

### THINK CDW

Our experts stay up to date on the latest threats and solutions. We can jump-start your IT team's efforts, deploying industry-leading SaaS solutions that will tailor security to your particular needs.

## Know we've got your back

Guesswork is the enemy of success with cloud. That's why your provider must be knowledgeable, versatile and thorough, at every step.

### CDW CAN HELP ...

#### Assess

We'll assess your infrastructure requirements for cloud readiness, then design your cloud solution using compatible vendors and delivery options:

- Discovery sessions
- Strategy reviews
- Assessments and health checks

#### Design

We'll work with our partners to customize the cloud solution that best aligns with your business goals:

- Strategy development
- System design
- Deployment planning

#### Deploy

Your processes, data and applications will migrate and integrate seamlessly with your new cloud solution, reducing your IT burden.

- Migration services
- Integration services
- Server consolidation and virtualization

#### Manage

At your place or ours, we can help you manage your new cloud infrastructure:

- Hosted services
- Managed service
- Day-to-day operational support
