

SOFTWARE AS A SERVICE

REDUCE CLOUD COMPLEXITIES

SIMPLIFY SaaS WITH ORCHESTRATION BY CDW

Cloud-based services have become conventional for organizations of all sizes. In order to keep up with the daily difficulties of managing increased network demands, an integrated cloud platform can simplify expanding data centers. The benefits of the cloud are clear: more agile and scalable networks, reduced costs, increased mobility, and more. But fears of integrating sensitive data and applications into the cloud concern many risk-averse IT managers. Improper implementation could, in fact, leave your whole system vulnerable. Fortunately, CDW can help you choose and deploy the right SaaS solution while helping you integrate it seamlessly into your organization. Our experts take a unique approach to ensure your employees can enjoy greater mobility and connectedness on a cloud platform that works best for your business.

PEOPLE WHO GET IT

-  Our experts can help you navigate a rapidly expanding SaaS market. CDW can also guide you through migration and implementation. Through a detailed assessment, design and deployment process, we can solve your specific business challenges and help you achieve your objectives.
-  Working with more than 50 of the market's industry-leading providers, CDW can provide you with tailored cloud solutions. We use our partnerships and expertise to bring you the right software, the best possible solution and the peace of mind to run your business.
-  Our dedicated staff of cloud client executives delivers standout offerings, professional installation and comprehensive assessments. CDW will design a migration and integration strategy with clear-cut benefits and low risk.

CASE STUDY

"... the CDW support that comes after the implementation makes the program well worth it for the peace of mind it gives."

Jeff Moss
CIO, Donald J Pliner

SUPPORTING A GROWING BUSINESS WITH CLOUD SERVICES

Learn how we helped luxury footwear company Donald J Pliner incorporate a complete cloud solution to make their growing business function on a whole new level. With the right IT strategy in place, they were free to concentrate on innovation and development.

THE CDW APPROACH

CDW offers a collection of planning services including guidance, assessment and optional engagements to coordinate your business goals with a specialized cloud plan. With our Migration Services, you can convert legacy applications and workloads as well as enable new cloud technology. And with our Integration Services, you can connect existing infrastructure with new cloud components.

ASSESS

We'll start with a kickoff consultation and cloud-readiness assessment with your dedicated cloud experts. This provides insight into your current environment so we can build a SaaS solution to fit your needs and goals.

DESIGN

Our experts can assist with migration by creating a plan for implementation and helping you transfer your servers, applications and databases. We'll help the process go smoothly and conduct a post-migration assessment to help ensure success.

DEPLOY

We'll help you determine the right cloud provider and design a seamless strategy for the cloud. And with our Integration Services, we'll make sure your existing infrastructure is equipped to handle your migration and will work alongside your new solution.

MANAGE

If you'd rather focus on other projects, we can also manage or host your cloud solution for you. You can scale the amount of service you want us to handle and enjoy access to our expert engineers and 24/7/365 remote-hands network connectivity.

PARTNERS WHO GET IT

Office 365™ is an advanced productivity solution that allows your employees to work how they want with trusted applications like Word, Excel®, PowerPoint® and Outlook® on all their favorite devices (Windows®, iOS and Android™).

Back up data on any device and get state-of-the-art protection with Druva. A centralized repository of backed-up files allows for rapid data recovery for lost or stolen devices as well as remote user access to any file from any device.

A leader in mobility management, Okta is an integrated identity and mobility management system. It is designed to connect users to cloud applications from mobile devices on a user-friendly and secure platform.

IBM Connections™ Cloud is a leading social network platform that helps you get work done. Connections allows your organization to engage the right people, accelerate innovation and deliver results.
