NUTANIX VIRTUAL COMPUTING PLATFORM

TOP 3 BENEFITS

☑ Fast Deployment
☑ Scalable One Node at a Time
☑ One Platform to Manage

The Nutanix™ Virtual Computing Platform converges server and storage resources into an easy-to-deploy integrated appliance. Data center capacity can be easily expanded one node at a time, delivering linear and predictable scale-out with pay-as-you-grow flexibility.

Nutanix is built with the same web-scale technologies and architectures that power leading Internet and cloud infrastructures, such as Google®, Facebook®, and Amazon® — and runs any workload at any scale.

SIMPLIFY IT

The Nutanix Virtual Computing Platform radically simplifies the deployment of VMs. Converging compute and storage into a single, integrated platform enables application and virtualization teams to quickly and simply deploy new VMs. The Nutanix Distributed File System (NDFS) runs on each Nutanix platform, aggregating direct-attached storage resources (hard disk drives and flash) across all nodes. This pooled storage is made available to all hosts, replacing the need for traditional centralized storage.

SUPPORT ALL VIRTUALIZATION PROJECTS

The Nutanix Virtual Computing Platform is an ideal solution for nearly any enterprise workload. Multiple appliance choices with different price-performance profiles, coupled with multihypervisor support, make Nutanix perfect for running different workloads at high performance, in a unified Nutanix cluster.

SINGLE MANAGEMENT PANE

The Nutanix Prism management framework delivers an intuitive graphical user interface (GUI). All information is organized and presented via elegant touch points to

CDW.com/datacenter | 800.800.4239

facilitate easy consumption of operational data. Prism provides the ability to define and manage a complete, converged infrastructure from nearly any device and includes a programmatic REST-based API for integration with third-party cloud management systems.

USE CASES

VDI/End-user Computing

- Plug-and-play appliance ready to run VMware® Horizon™ Suite, Citrix® XenDesktop® and Citrix XenApp®
- Predictable scale-out architecture to seamlessly expand VDI pilots to full production deployment
- Support for all VDI users, including persistent and graphics intensive desktops

Private Cloud/Server Virtualization

- Turnkey platform for running popular applications, such as Oracle®, SAP®, Microsoft® SQL Server®, Exchange and Sharepoint®
- Distributed architecture provides storage quality of service (QoS) for multiworkload and multitenant environments
- Hypervisor agnostic provides choice of virtualization

Big Data

- Applications run adjacent to other services with no performance degradation
- Better performance than bare metal

PEOPLE WHO GET IT

Our account managers and solution architects receive ongoing training on new and upcoming data center partners like Nutanix. And we have the experts with the experience you need to help you choose and implement your new Nutanix solution, including:

- 280+ members of the data center solutions team
- 450+ certifications from the solution architects
