Backup Exec™ 15 delivers powerful, flexible and easy-to-use backup and recovery that is designed for your entire infrastructure regardless of platform: virtual, physical or cloud. With Backup Exec, you get fast, reliable backup and recovery of data and systems at every level and advanced integration with the most recent releases of VMware vSphere® and Hyper-V®. In a matter of minutes, you can recover anything including VMs, applications, databases, files, folders and singular application objects. With a special migration option, you can now take advantage of the Symantec Backup Exec Capacity Edition solution and upgrade your old licensing to give you more capabilities, reduce data storage and solve for disaster recovery. Backup Exec saves time, money and helps ensure your critical information is always protected and easily recoverable.

**FLEXIBLE**

Not every backup solution has the flexibility to protect your environment while also delivering agile recovery. Backup Exec protects both virtual and physical architectures and can back up anything to virtually any storage device and can restore almost anywhere. From VMs, to entire servers, applications, single files and folders or granular application objects, Backup Exec is the single solution for all of your needs.

Virtual and physical data protection in a single solution – Lowering costs and simplifying backup tasks starts with deploying a single solution that is designed for your entire infrastructure regardless of platform: virtual, physical or cloud. Deeply integrated with VMware®, Microsoft® and Linux® platforms, Backup Exec can protect one to thousands of servers and virtual machines all from the same user console, providing optimal performance and efficiency. Scalability is an important consideration in backup and recovery, and Backup Exec will support you as your organization grows.

**POWERFUL**

When you can solve more problems, with less complexity, you have a simple yet powerful solution to meet your every need. Backup Exec can help you meet backup windows, reduce data protection costs, secure confidential data, optimize your existing storage and eliminate outdated and siloed backup and recovery complexity.

Fast and reliable backup and recovery – Backup Exec enables you to meet your recovery time and recovery point objectives by significantly reducing the time it takes to backup and recover your data. With Backup Exec you can mitigate the risk and cost of downtime by using a wide variety of flexible backup and recovery methods. Whether you are using disk, tape or cloud your data is protected and easily recoverable.

**EASY TO USE**

Complex backup and recovery products can be inefficient, time consuming and expensive to manage. Through intuitive wizards and insightful dashboards, Backup Exec is easy to implement, use and manage, whether you are upgrading from a previous version or switching from a competitive product.

Along with your dedicated account manager, CDW has Symantec-trained and certified experts who can help find the right backup solution for you, including:

**Managed Services:**

- Dedicated Partner Specialists focused on Symantec Backup
- 60 field-based data center solution architects
- 60+ Symantec Information Management certifications and accreditations
