

# IT'S WHO YOU KNOW:

## CDW + TIGERTEXT SECURE TEXT MESSAGING

### WHEN IT COMES TO SECURE TEXT MESSAGING, IT'S NOT JUST WHAT YOU KNOW. IT'S WHO YOU KNOW.

That's why we partner with industry leaders like TigerText. Their secure text messaging app for smartphones, tablets, notebooks and desktops allows you to benefit from the increased productivity that mobility can provide while keeping your organization's devices compliant with major security policies. As their largest channel partner in 2013, we have the experience and expertise to make secure text messaging work for you. Together, we can help you bring collaboration to the next level without compromising security.

## TIGERTEXT GETS SECURE TEXT MESSAGING.

### IRONCLAD SECURITY

TigerText is PIN locked and containerized, and it features end-to-end encryption. That means pictures and messages sent through TigerText can't be saved on the device's hard drive or accessed by other applications. It also blocks attempts to forward messages out of your enterprise's network and maintains a database of approved devices. TigerText meets all regulations for sensitive data communication policies and is compliant with the Sarbanes-Oxley Act (SOX) and the Health Insurance Portability and Accountability Act (HIPAA).

### VERSATILE USABILITY

TigerText syncs across platforms, so whether you're using your phone, tablet, notebook or desktop you'll receive your messages immediately. The app has the ability to send pictures, texts and even voice dictations. It also supports group texts and chat rooms for enhanced collaboration. TigerText timestamps each transmission, so you'll know exactly when your message was received and read. Messages can also be archived securely on the cloud or your on-premises data center.

### EASY ADAPTABILITY

Unlike other secure texting solutions, TigerText has an open application programming interface (API) that allows it to quickly and easily integrate with your current IT environment. You can customize the app to safely sync your messages with your existing paging or email system, so you'll be able to streamline communications without having to get rid of your current solution – and without compromising security or compliance.

## CDW GETS HOW TO MAKE IT WORK.

Take a strategic approach to mobility with CDW Total Mobility Management.

CDW Total Mobility Management combines our expertise, partners and solutions to enable you to integrate, control and simplify all aspects of mobility in your organization. Instead of just providing software, services and platforms, we develop a strategic approach in each phase of implementation, from planning to support. So you'll have the control and stability your competitors are still searching for. Here's how it works:

### 1. PLAN

We will help you construct a plan that outlines policies, security and end-to-end network strategies.

### 2. ENABLE

CDW's Mobility Management Portal enables cross-carrier device selection and provisioning.

### 3. PROTECT

We can help you protect your mobile environment with centralized management tools.

### 4. SUPPORT

We offer 24/7 help desk support for users and can also provide remote MDM administrative support for IT.

### 5. EMPOWER

We can assist with customized app development, collaboration and a branded employee app store.

## WE GET IT.

### THE PEOPLE

Our team of mobility, security and networking specialists receives regular training on our partners' products, and they're always up to speed on the latest regulations. That means that they're always certified and can help you solve your unique problems in the right way. Additionally, your solution architects will work with you to set a device management policy and communications procedures that will help you smoothly integrate TigerText into your current environment. We can also help you design, develop and manage a mobility solution that will ensure compliant devices, effective and secure communication, and productive employees.

### THE PRODUCTS

In addition to the TigerText secure text messaging solution, we have everything you need to keep your organization's mobile data safe, secure and compliant. Because we're able to bring together products and services from leading mobility, security and networking partners, we can offer more options than any individual vendor or carrier. So if you decide to implement a new mobility solution, we can custom build it to your needs. And that means your coworkers will be able to communicate more effectively – and more discreetly.

### THE PLAN

Taking control of your organization's mobile data can be overwhelming. We can support your environment with several different solutions, depending on your requirements. Our Total Mobility Management solution combines the expertise, partners and strategies you need to integrate control and simplify mobility management, while our Mobility Management Portal consolidates several IT tasks into an easy-to-use dashboard. We also offer 24/7 live help desk service and a one-of-a-kind app marketplace that connects you to developers who can create custom apps for your organization.

## IT'S OFFICIAL.

### TAKE IT FROM US.

"CDW UNDERSTANDS THAT ORGANIZATIONS NEED TO INTEGRATE MOBILE I.T. INTO A ROBUST INFRASTRUCTURE IN ORDER TO REALIZE MOBILITY'S FULL PROMISE.

We are introducing CDW's Total Mobility Management portfolio to help them lift that load by leveraging our years of experience providing wireless communications and building local and wide area networks, along with our heritage of partnering with the industry's leaders and innovators. Plus, our new Mobility Management Portal will enable customers to access most of the services they require easily and in real time, to simplify their day-to-day operations."
