TOTAL SOFTWARE MANAGEMENT

Contract Management Overview

Contract Management from CDW can help you manage multiple licenses, vendors and software. Our longstanding partnerships and expertise with the top software publishers allow us to keep it a simple yet effective part of our Total Software Management solution — all with our experienced professionals assisting you throughout the process.

Highlights Include:

Software License Agreement Management (SLAM) — Online viewing of details for each contract: start date, renewal date, licenses purchased, etc.
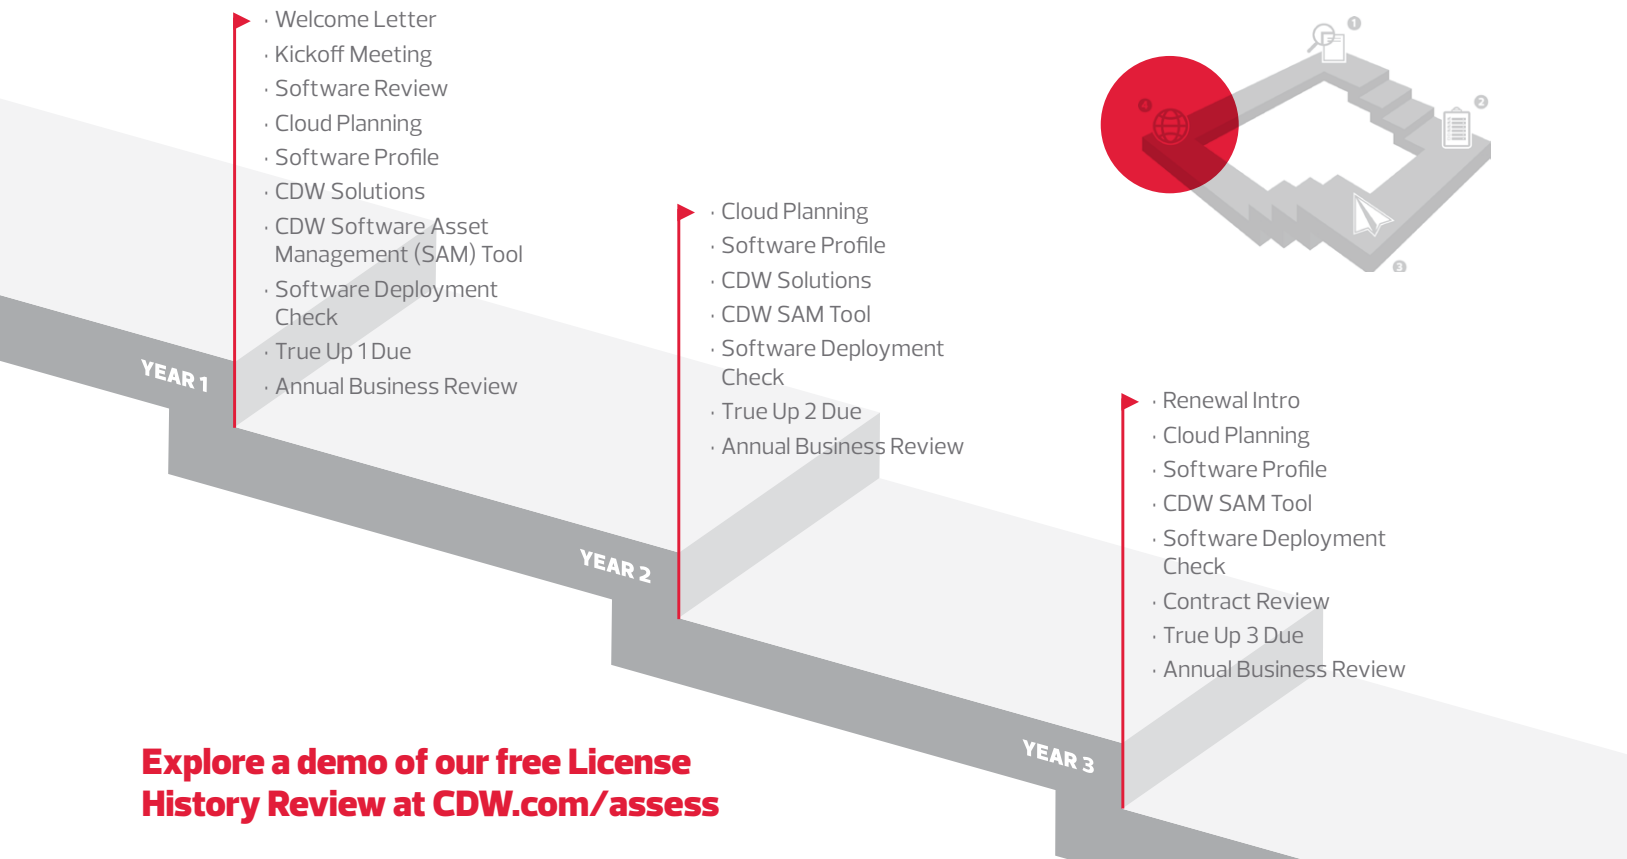

SLAM Activity Spreadsheet — Updated monthly, this online workflow tool identifies which activities have been completed and which are coming up.

Key Performance Indicator (KPI) Report — A forward-looking contract management activity and trend report.

Dedicated Account Management — Our licensing account executives conduct regular reviews and deep dives to help manage your software licenses.
