Simplify Interactive Wireless Classroom Presentation with ViewSync® 3

Challenge

Your classrooms need the convenience of interactive wireless presentation sharing to promote collaboration. Is there an easy, cost-saving way to quickly add this functionality for an entire roomful of students – even if you still have outdated wiring?

Solution

The ViewSonic® ViewSync® 3 wireless presentation gateway offers an easy, value-minded way to eliminate cord clutter, add convenience and boost collaboration. Delivering quick and easy 1080p content streaming to any projector or display, this slim, cost-saving device eliminates the need for cables, saving class time and removing tripping hazards. Increase the interactivity of 1:1 computing and BYOD with the ability to connect and stream from up to 60 devices, including laptops, tablets and smartphones, while also offering real-time annotation and screen interaction. Moderator Mode keeps class time efficient by enabling an instructor or designated student to preview, control, and moderate content from all devices. To get started, simply plug the included AutoProject Key USB dongle into any laptop for instant content sharing. Seamless with new installations as well as ideal with legacy (VGA/RCA) wiring, the ViewSync 3 facilitates HDMI connectivity without the costs and hassle of running an additional cable. Simply install the ViewSync 3 gateway at the projector and connect via HDMI port to achieve seamless wireless presentations with the clarity of 1080p. Features include:

- Easy and instant projection with AutoProject™ Key
- Manage content from up to 60 connected devices
- Concurrent support for WiFi, Miracast, and DLNA
- Real-time annotation and screen interaction
- Dual band wireless support

What you'll need to add convenience and boost collaboration in the classroom:

▸ A ViewSonic ViewSync 3 Wireless Presentation Gateway with included AutoProject™ Key

▸ A device with HDMI or VGA port for content streaming
  - ViewSonic Projector
  - ViewSonic Large Format Display
  - ViewSonic Monitor

▸ Mobile device for content sharing
  - Laptop
  - Tablet
  - Smartphone

▸ Available Apps from App Store or Google Play!
  - ViewMirroring (Android)
  - ViewMedia (Android / iOS)
