SECURITY ASSESSMENTS:
IT'S WHAT WE DO.

Security is a game of chess. Threats are adopting innovative strategies. To protect your organization, you need to know where all the pieces are and where the gaps are in your defense. We get it. And we have the people, the partners and the plan to assess and improve your security infrastructure.

CDW PEOPLE WHO GET IT™

WE'VE GOT THE PEOPLE.

ACCOUNT MANAGERS

Our account managers give you a single point of contact dedicated to your security needs. They are regularly trained on the latest security products and can help you put the pieces in place.

SOLUTION ARCHITECTS

Equipped with a deep understanding of the security landscape, our solution architects can assess your IT environment and develop a customized plan for your specific security needs.

SECURITY ENGINEERS

Our security assessment team can provide a "white hat hacker" approach to test your security from the perspective of a cybercriminal. They can find vulnerabilities and suggest ways to plug the gaps.

WE'VE GOT THE PARTNERS.

McAfee An Intel Company

McAfee Network Security solutions include next–generation firewall security and intrusion prevention, advanced behavior analytics and sophisticated threat detection engines, all designed to protect your next–generation networks.

RSA The Security Division of EMC

RSA, the Security Division of EMC, helps organizations solve their most complex and sensitive security challenges. RSA brings visibility and trust to millions of user identities, the transactions that they perform and the data that is generated.

Symantec™

Symantec's solutions enable you to standardize security, compliance and management across platforms and endpoints, helping to ensure that information, infrastructure and processes can be protected, managed and controlled easily and automatically.

websense®

Websense TRITON security combines web security, email security and DLP modules into one powerful solution. With shared analytics, flexible deployment options and a unified management console, it's the effective and economical solution for today's security challenges.

WE'VE GOT THE PLAN.

Our expert security engineers are available to conduct a number of security assessments on your existing environment, including:

CDW THREAT CHECK

A complimentary service, powered by Symantec security technologies. It monitors your network to reveal known malware and provide insights to help you build a better security solution.

COMPREHENSIVE SECURITY ASSESSMENT

Goes beyond traditional vulnerability scans. It approaches your environment from the perspective of a committed, sophisticated cybercriminal.

RAPID VULNERABILITY ASSESSMENT

Using automated tools, we test your network for known weaknesses and provide recommendations for closing any exposures that we find.

APPLICATION SECURITY REVIEW

A holistic approach that involves four phases for analyzing the security of your applications. Identifying base technologies, identifying application components, reviewing code and testing possible exploits.

WE'VE GOT THE PROOF.

INDUSTRY CERTIFICATIONS

- Certified Information Security Manager (CISM)
- Certified Information Systems Auditor (CISA)
- Certified Information Systems Security Professional (CISSP)
- Certified Secure Software Lifecycle Professional (CSSLP)
- Cisco Certified Internet work Expert (CCIE): Security
- Cisco Certified Security Professional (CCSP)
- Global Information Assurance Certification (GIAC)
- GIAC Certified Incident Handler (GCIH)
- Microsoft Certified Systems Engineer (MCSE): Security
- Multiple Master Certifications with leading security vendors
- PCI ASV

PARTNER CERTIFICATIONS

- Cisco Master Security Specialized
- Symantec Master Specialized Data Loss Prevention

AWARDS

- Cisco Americas Commercial Partner of the Year 2012
- Cisco Americas Partner of the Year 2012
- Cisco Americas Public Sector Partner of the Year 2012
- Cisco Central Area Capital Partner of the Year 2012
- Cisco Central Area Partner of the Year 2012
- Cisco East Area Commercial Partner of the Year 2012
- Cisco Nationals Collaboration Partner of the Year 2012
- Cisco West Area Borderless Networks Partner of the Year 2012
- McAfee Corporate Partner of the Year 2012
- Symantec Public Sector Partner of the Year 2012
- Symantec SMB/Commercial Partner of the Year 2012

KEEPING THREATS IN CHECK:

CASE STUDY: Threat Check

WHAT WE FOUND:
In the summer of 2012, a large enterprise manufacturer engaged us to perform a CDW Threat Check. We worked with the customer to passively analyze their environment and its applications, uncovering:

- 80+ different hosts infected with spyware and malware
- Seven compromised machines that were actively communicating with five different botnet controllers
- Three machines being remotely controlled by unauthorized personnel through VNC and Microsoft Terminal Services, using what they believed to be a compromised service account

WHAT WE DID:
CDW Threat Check gave the customer the security information they needed to address the issue before critical data was lost. And we helped the customer identify, localize and understand the ramifications of the breach — simplifying cleanup and reducing costs.
